PROFESSIONAL EXPERIENCE

Founding Growth Marketer · First Marketing Hire & Function Owner Jul 2025 – Present
nRev · AI GTM workflow automation platform *Pune, India*

- Built and led the marketing function from zero as first marketing hire, feeding the pipeline behind 324 booked meetings, 1,200+ signups (from under 10 to ~100 a month), 30 paying customers and ~$300K ARR with no paid ads.
- Grew organic search sessions 26x and Google impressions ~97x, taking US ranking keywords from 13 to 1,172 (47 in the top 10) across a 75-page site and 1,000+ CMS pages, and earned 33,500+ AI-answer citations (93% non-branded).
- Ran or represented nRev at 25 GTM events in 10 months, including 12 Luma events with 564 approved registrations from 809 requests; event accounts including PriceLabs, Spendflo, Zuddl and Mysa became customers.
- Designed the signal-based invite engine behind those events: 26 Instantly campaigns to 12,388 enriched leads, with the best competitor-signal invite drawing 3.7% replies, about 4x the program average.
- Tested 6 cold outbound angles on 3,000 leads, piloting each before scaling; competitor-engagement signals won at 2.1% replies, about 5x the hiring-signal angle.
- Converted 150–200 LinkedIn outbound replies a month into 20–25 booked meetings across ~12 sender profiles.
- Built AI-run growth tooling with Claude and Claude Code: an MCP server that brings Search Console and GA4 into Claude, a Weekly SEO Brain workflow with a dashboard (nRev Elite) that ranks each week's SEO fixes for one-click approval, an nRev agent that sourced the weekly GTM Job Board (27 runs) and a code-built product video pipeline.
- Grew the LinkedIn page 108% with no paid spend, second only to n8n in a 10-company AI/GTM set and ahead of Clay (71%); a weekly roundup series drove 41% of impressions from 16% of posts.
- Led a team of 6 (growth ops, GTM engineering, 2 interns, a web developer and a UI/UX designer), wrote the CEO's Q2 GTM plan and investor growth review, and co-led the Product Hunt launch.
